

## This is what we do

We support you to take control of temporary staffing costs, achieve sustainable change and meet your workforce compliance goals.

Ideal for fast track delivery, our Software-as-a-Service solutions help Trusts and Health Boards extract greater value from their investment in workforce systems, with a typical transformation value of £6m per annum.

Our products and services range from automating one-off reports through to in-depth transformation programmes, designed to suit the unique challenges and priorities of our Trusts and Health Boards.

Our optional shared reward programme is attractive to customers looking to minimise risk as they work with us.

# Get to know us better

Oceansblue are an award-winning data science company with deep experience in e-rostering transformation, underpinned by our unique ability to deliver freeform database analysis on core NHS workforce systems.

We converge workforce data into a rich repository to enable leading-edge AI and analytics solutions.

Oceansblue have worked exclusively with the NHS for over 20 years and our range of solutions have been developed in collaboration with our partner Trusts and Health Boards.

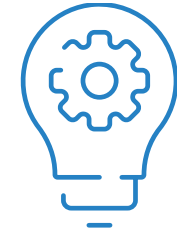

“We pride ourselves on delivering an intelligent and responsive service, based on à la carte analytics for those NHS customers with a thirst for data, who are demanding greater depth and breadth to their reporting and data science capabilities.”

Keith Elkin,

CEO, Oceansblue

# A solution for each of your challenges

Gain an independent view highlighting cost and efficiency improvements to add to your CIP for this Financial Year.

Discovery Audit

Use our AI-powered virtual assistant to intelligently nudge wards in natural language towards full rostering effectiveness, lock in savings and even help to automate roster clinics.

Ward Guardian

Data from multiple systems can be drawn into one easy-to-access Data Hub, and joined together to enable standardised reporting across various systems and to enable fresh CIP correlations.

Data Hub

Create bespoke, automated reports to add depth to your core workforce reporting, save hours in your BI and roster teams and liberate your rostering experts to focus on helping underperforming wards.

Reports Your Way

Address staffing issues before they happen, with AI models to forecast patient demand and staffing numbers, staff sickness and retention and temporary staffing cover outcomes.

Foresight Models

Empower your BI team with an automated feed of your rostering data – millions of rows in an accessible format - to feed your data warehouse.

Data Direct

# We're proud of our track record of success

“

“Oceansblue’s Ward Guardian drives rostering improvements by issuing timely, tailored guidance in natural language to our wards. It’s fully automated and AI-powered - like having a virtual rostering expert sat by each ward every day. Ward Guardian is also a huge reporting time-saver for us - it frees our e-rostering experts to focus on helping our wards to improve.”

*Paul Marston,*

*Head of Workforce Systems and Utilisation,  
Liverpool University Hospitals NHS  
Foundation Trust*

“Working with Oceansblue is straight-forward - they are flexible in their approach and fast to respond to ad-hoc changes and challenges. They understand the complexity of NHS systems – and combine their experience with forward-thinking to develop solutions that are effective and solve problems. I’m pleased to have them in my corner.”

*Craig Stewart,*

*Head of Workforce Intelligence, Camden and  
Islington NHS Foundation Trust*

“The key benefit of the new insight we’re receiving from Oceansblue is the level of control it gives us. We can focus on areas that need support to improve their Bank and Agency planning. We’re also able to see metrics we couldn’t see before, presented “our way” – and because reports and alerts are automatically generated and distributed, it’s a real time-saver for our reporting team!”

*Vaneesha Rai,*

*Development Manager,  
Trust Bank Services,  
Sandwell and West  
Birmingham NHS Trust*

”

We're well connected and straight-forward to work with

As an Allocate partner, we work closely with their teams to seamlessly deliver a collaborative service.

We are an accredited and approved G-Cloud supplier, ensuring our pricing is transparent and our procurement processes are straight-forward.
